

Series "T" Burners Single-Slot Burners DB309A1

Description

"T" Series single slot burners have cast iron bodies and stainless steel ribbon ports. They provide a very evenly distributed and stable flame over the entire range of turndown. An almost unlimited variety of flame lengths can be specified. Available in various shapes.

These single-slot "T" burners are particularly suitable for flame treating fabricated plastic items and other direct-flame applications.

All Flynn "T" single-slot burners operate with natural, manufactured or L.P gas and an air-gas mixing system that utilizes a compressed air supply or a conventional combustion air blower.

Capacities-BTU/hr

Dp. No	Designation	Flame Space	Operating Capacity	Minimum Capacity	Maximum Capacity	Mixer Size
068500	T-520	2"	6,000	2,000	12,000	1 FUM
068600	T-521	3-3/4"	11,000	4,000	22,000	2 FUM
068700	T-522	5-3/4"	17,000	6,000	30,000	3 FUM
